**NOTES:**

- 1** Only USB2.0 connection is supported. The Logi CollabOS does not support uncompressed video capture. Video resolution will be limited to 1080p.
- 2** MTR default camera can be changed in: Teams Admin Settings / Devices / Room Camera. Default audio peripherals can be changed into CollabOS / Display and Audio / Audio / Enable External Audio.
- 3** Roommate supports only one USB audio device at a time. A USB device with only an audio input will not work in Teams Mode. To avoid issues, disabling USB camera audio support is recommended. CollabOS **does** not allow selecting preferred audio devices.
- \* Rally Bar Mini in Zoom Rooms mode requires 720p USB resolution to **work**, SHARE2/SHARE2U & CAM300 DIP switch #1 below the unit must be ON.
