

# U-BRIDGE 3 WP

USB 3.2 Gen 1 camera and device extender with a wall plate

INOGENI

**NEW**

**EXTEND 2x USB 3.0 CONNECTIONS**  
UP TO 100 m/330 ft.

## U-BRIDGE 3 WITH A WALL PLATE EXTENDER FOR MID AND LARGE ROOMS

Extend 2x USB 3.2 Gen 1 connections up to 100 m/330 ft.

The U-BRIDGE 3 WP, with USB-A and USB-C on the wall plate device, features a sleek wall finish and easy access to connect high-quality cameras and videobars, DSP, HID devices or mouse and keyboard. This ideal solution for mid- and large-size rooms bridges USB 3.0 connections from a host laptop or PC to USB cameras, speakers, videobars or INOGENI devices, up to 100 m/330 ft. over a single CAT6A cable. U-BRIDGE 3 WP uses HDBaseT transmission to facilitate reliable and stable connectivity.

## U-BRIDGE 3 WP – USB 3.0 multi-device extender Versatile technology

- USB 3.2 Gen 1/5 Gbps backward-compatible with USB 3.1 Gen 1/3.0/2.0
- 4K video camera and audio extender enable SuperSpeed connections
- Sleek wall plate design to fit in a professional office design environment
- Reliable long-distance USB camera extension maintains high-quality, uncompressed video
- DEVICE wall plate ports: 1x USB-A and 1x USB-C
- Connect high quality PTZ cameras and video bars, DSP, HID devices or mouse and keyboard
- PC HOST port: Lockable USB-C connector
- Link: Up to 100 m/330 ft. over a single CAT6A
- Powered by either the PC HOST or DEVICE wall plate
- RS-232 extension for VISCA or control (PC HOST or DEVICE)
- Perfectly compatible with cameras and UC CODECs
- TAA-compliant and made in Canada

## The U-BRIDGE 3 WP is fully compatible with all USB cameras

It can be integrated with professional-grade equipment, such as AVer, Logitech, Jabra, ClearOne, Huddly, HuddleCamHD, PTZOptics, Lumens, Marshall, and web cameras. Powered by either the DEVICE or the PC HOST module.

## HOW IT WORKS

Extend your USB 3.0 devices to any CODEC or videoconferencing system

The U-BRIDGE 3 WP offers unmatched versatility and reliability. It extends up to 2 USB 3.0 connections (1 USB-A and 1 USB-C) up to 100 m (330 ft.)—far beyond the standard 3-meter cable limit. Designed specifically for USB 3.0 devices and systems, the U-BRIDGE 3 accommodates a range of peripherals, including cameras, microphones, audio devices, and more. Its backward compatibility with USB 2.0 ensures seamless integration with a wide variety of devices. It provides 1.8A that can be shared between USB ports to enhance functionality and convenience.

## Designed for the extension of USB 3.0 devices and systems

SuperSpeed USB at 5 Gbps and powered by either the DEVICE or the PC HOST module

### DEVICE side:

- USB 3.2 Gen 1/5 Gbps backward compatible with USB 3.1 Gen 1/3.0/2.0
- 2x USB3 (1x USB-A and 1x USB-C)
- Supports cameras, whiteboards, DSP, HID, microphones, audio devices, and any other USB devices
- Provides up to 1.8A to be shared between the 3 USB ports

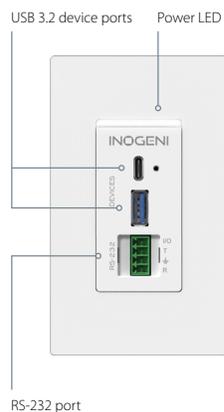

### PC HOST side:

- 1 USB-C 3.2 Gen 1 backward-compatible with USB 3.1 Gen 1/3.0/2.0
- Connect to a laptop or any UC videoconference systems, such as Microsoft Teams Rooms (MTR), Zoom Rooms, CODECs, and Room PCs from Lenovo, Poly, Crestron, Cisco, Logitech, Q-SYS and Barco

### PC HOST

### DEVICE wall plate

### Link

- Up to 100 m/330 ft. extension
